

Project	Request	Type	Category	Country Reference	Description
MB - Web	014119	Fault	Booking	BE	Fixed a bug, introduced by release 6.00.096.006 Start and End dates of playweek are set correct.
MB - Web	014088	Enh.	Booking	BE	When bookings are created manually, the start- and end play date are now set correctly for cinemas that have a playdate day that differs from the default playdate day (option 334, thursday for the netherlands, wednesday for belgium) When figures are added to this booking the correct days are now shown.
MB - P.B.	014000	Enh.	Title	NL	It is no longer possible to manually add a code external to a title, if this code external already exists.
MB - P.B.	013977	Enh.		ALL	Calculation for BUMA invoicing is now similar to OCW calculation: Distributor figures are only used when Exhibitor figures are not present.
MB - P.B.	013934	Enh.	General	BE	When e-bookings are created while importing figures (booking not found), the start play date and end play date are set correctly, according to the play date day of the cinema. Now the correct days are shown when GBO/BOR figures are added manually in client or webapplication.
MB - Web	013911	Enh.	General	BE	When saving a report as xls in the webapplication. columnheaders are now shown.
MB - P.B.	013721	Fault	GBO/BOR	NL	In some cases when an ebooking was created, the wrong figures were reset, resulting in wrong GBO/BOR
