

Project	Request	Type	Category	Country	Reference	Impact	Description
Maccs - Generic	014580	Enh.	Relation	ALL		Low	Bank Statement / Relation Explorer : Ability to search on code local (D/C#) added.
TD - Theatrical	014600		Support Interface	CA		Low	Export Finance: Export Payment: When the difference between the invoice amount and the received amount were negative then Export Payment was picking up the Invoice amount instead of the Paid amount. This has been improved.
TD - Theatrical	014568	Enh.	General	ALL		Low	Discount Terms - expired column was not initialized correctly.
TD - Theatrical	014592	Enh.	Finance Report	ALL		Low	Interest Invoices - Customer reference number added. this replaces the License agreement number in case the customer reference entered.
TD - Theatrical	014599	Enh.	Booking Report	DE		Low	Holdover Report: Number of seats column added.
Maccs - Finance	014582	Enh.	Finance Report	ALL		Low	Paid Invoice Report: Date selection can now be done on - value date - approved date - posted date
Maccs - Finance	014593	Enh.	Reminder	DE		Low	BOR Reminder - (DE) - New Layout added. If customer reference is used this will be presented, otherwise the LA# is used.
TD - Theatrical	014530	Fault	General	JP		Low	Maccs invoicing. Improved performance and fix for - settlement - provision - invoicing - etc.
TD - Theatrical	014589	Fault	Booking Report	CA		Low	Window layout (defaults): Bug Fix. When a report gets a new column with an upgrade in some cases an assertion failure occurred. This bug has been solved.
TD - Theatrical	014626	Enh.	Payments	ALL		Low	BANK Statement: Share amount among Payer Group button takes the highlighted payer as main payer instead of the first payer
TD - Theatrical	014627	Enh.	Payments	ALL		Low	Bank Statement: Payer is not null, therefore when the payer is made blank it will default to the 'None' Payer
TD - Theatrical	014629	Enh.	Payments	ALL		Low	Bank Statement: Paste relation and Select relation in context menu enabled for Concept Statement
TD - Theatrical	014559	Fault	Invoicing	DE		Low	Invoice: The "Suppress Interest Invoice" tick from the payer is now always copied to a newly created invoice
RIS	014574	Enh.	Rights Purchase Contract	ALL		Low	Purchase Contract: Approval functionality added to new maintenance screen. Matrix is protected when contract is set to approved.
TD - Theatrical	014351	Enh.	Booking Report	AU		Low	Day Figures by Title Summary Report: Weeks til now column can now contain either the total boxoffice over all day figures or the total over all bookings
TD - Theatrical	014488	Fault	General	FB	4766	Low	Relation Address: When adding a new address for a licensee or a retailer the data could not be saved. This is fixed
TD - Theatrical	014570	Fault	Interface	FR	4775	Low	Import EDI - (FR): Record type '03' (containing ticket price data) is handled the same as type '04'.

Project	Request	Type	Category	Country	Reference	Impact	Description
TD - Theatrical	014597	Fault	Interface	CA		Low	Interface, Import EDI - When importing different screens on one day sometimes the 'screen description origin column' was too small. This resulted in not being able to save the import. Now this column is wide enough.
TD - Theatrical	014562	Enh.	Payments	DE		Low	Bank Statement: When a payment is being approved or set to 'To Be Approved' and the payment amount is more than the invoice amount you get message 3732: "Amount is greater than total amount in document xxx ". Now the payer / supplier and the record line number is added to the error message.
TD - Theatrical	014563	Enh.	Payments	DE		Low	Bank Statement: Due to data conversion some invoices have the same invoice #. In some cases error messages popped up wrongly.
TD - Theatrical	014558	Fault	GBO/BOR	DE		Low	Figures: Returns Window - When entering BOR figures and changing the FFA amount Distributor and Exhibitor figures were not kept in sync. Now this is the case until the booking is being saved.
RIS	013357	Enh.	Rights Sell Contract	ALL		Low	Rights Sell: Button added to tabpage Title to generate a popup with all conflict notifications when a row becomes red.
RIS	014379	Enh.	Rights Sell Contract	AU	paul	Low	Rights Sell Contracts ~ button 'holdover', when clicked sell contract details and shippings will be kept in sync if applicable.
RIS	014550	Fault	Rights Sell Contract	ALL		Low	Rights Sell Contract: When the currency is changed, the amounts on the returns tabpage is set to zero when the licensor percentage is greater than zero. This problem is solved.
RIS	014625	Fault	Rights Purchase Contract	ALL		Low	Expiration date isn't calculated right. It should be one day less. This problem is solved.
TD - Theatrical	013754	Enh.	Booking	ALL		Low	Contract: Add New Contract window: When closing the Select Print window with the red 'close' button the contract still got generated. Now contract generation is being cancelled.
TD - Theatrical	014536	Fault	Prints	ALL		Low	Print Details ~ seek: when typing a character in the title box and trying to close the window a null reference error occurred. This is solved
RIS	011211	Enh.	Rights Purchase Contract	ALL		Low	Purchase Contract: Trigger Exploitation Date (TED), functionality added. TED flag added to code table Purchase Event. While creating events for a title within a P. Contract this flag is taken over. If the event date of an event has been entered and the TED has been enabled or the TED has been enabled and the event date is filled in, the exploitation dates of a title will be calculated. The exploitation date of the first film rights, lowest sortorder, will be set equal to the event date. The exploitation date of the next film rights are calculated. No calculation will take place if holdback is empty or license period approved.
RIS	014442	Enh.	Rights Sell Contract	ALL		Low	Rights Sell Contract: Tabpage title sorting changed. Sorting is now based on the sortorder.
RIS	014443	Enh.	Rights Sell Contract	ALL		Low	Sell Contract Details ~ tabpage returns: sorting is now based on Start Reporting.
RIS	014446	Enh.	Rights Sell Contract	ALL		Low	Rights Sell Contract: Generate importfile contains licensor percentage. This percentage isn't imported back into the system. It could be used to calculate the amount. If the amount is left empty and the real price and buys are filled in, the system calculates the amount. The licensor percentage is taken into account within this calculation.

Project	Request	Type	Category	Country Reference	Impact	Description
RIS	006396	Enh.	Rights Purchase Contract	IN	Low	Rights Purchase Contract: If an exploitation date is entered and the terms exploitation date is filled in the expiration date is calculated. The expiration date calculation is based on the exploitation date of the first film right, lowest sortorder, of a title. The number of years, terms expiration date, is added to this date and will become the expiration date of all rights of a title. This can be still manually overruled.
